Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dreeszen (figs. 1 or 3 emb) in view of Naughton et al (fig. 4 emb) and either Coles et al or Kuhn et al. Dreeszen discloses all structure of the claimed case and blank except formation of the maximum height of the front and/or rear walls less than the maximum height of the side walls. Naughton et al teaches that it is known to make octagonal cartons with reduced height front and/or rear walls to facilitate display while maintaining the desirable octagonal shape of the container. Each of Coles et al and Kuhn et al teaches that it is known to make the front and rear walls in a box shorter than the other side walls and to make the attachment flaps with a short width relative to the overall width of the front and rear walls to provide a display window therebetween. It would have been obvious to make the front and rear walls and the attachment flaps in Dreeszen as taught by Naughton et al and to so in a manner as taught by either Kuhn et al or Coles et al to provide display of the contents through the front and rear of the box. The concept of making a display window in a box by making the walls and flaps of shorter length and width, respectively is well known in this art.

Allowable Subject Matter

3. Claims 10 and 11 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claims 1-5, 8 and 9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses in Office Actions to (571)273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a PTO deposit account. Please identify the Examiner and art unit at the top of your cover sheet.
